

# INGRANAGGI GANDINI

COMPANY PROFILE

“THERE IS A FUNDAMENTAL PRINCIPLE THAT DETERMINES  
SUCCESS, IN WORK AS IN LIFE:  
NO CUNNING, BUT ABSOLUTE RELIABILITY  
AND CORRECTNESS.”

Ernest Abbe (1840–1905)

Gandini Ingranaggi is a metalworking company founded in the sixties by Mr. Ruggero Gandini and it has been pivotal over the last 50 years for many industries thanks to its state-of-the-art CNC machinery and highly qualified personnel. Gandini Ingranaggi can ensure high quality products, technical support along the entire chain, the best market prices and short delivery time. Today the company is run by the sons Nicola and Stefano Gandini who are able to develop it further day after day, adapting the company to the constantly changing market. In its 3000 m2 working facility in Castenedolo, nearby Brescia (IT), Gandini Ingranaggi has at your disposal a large fleet of latest generation machines and a complete tools warehouse to exceed your needs and expectations.

# MISSION

The quality of our gears together with the professionalism and high level of service, have been at the forefront of our company's mission for over 50 years.

Our gears are produced with different hobbing techniques in order to satisfy requirements of our customers.

We have a large and innovative "Machines park" that can guarantee to our customers high quality product and better service in terms of quality, prices and on-time delivery, working within an organization aimed at streamlining.

## INDUSTRIA 4.0

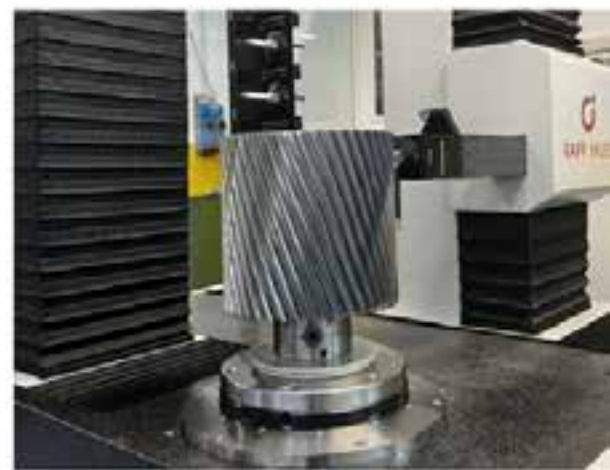

# VISION

Gandini gears: evolution and innovation. Our company is constantly in evolution, thanks to the staff, new technologies, the use of innovative software and continuous updating. We always try to meet customers needs and the Italian and foreign market.

United in consolidating our reality we been motivated by the desire to increase the productive skills, without never neglecting the relationship ethical-human, with the extreme purpose of become the best specialists of mechanical precision gears. For these reasons, in 2021 we opened the new area, an entire space dedicated to grinding gears.

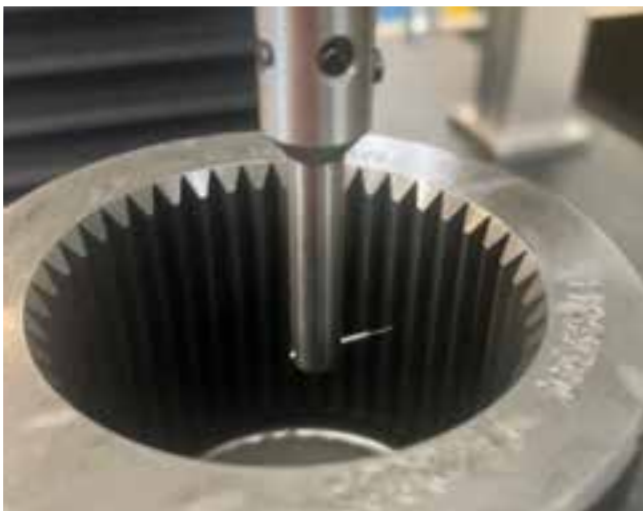

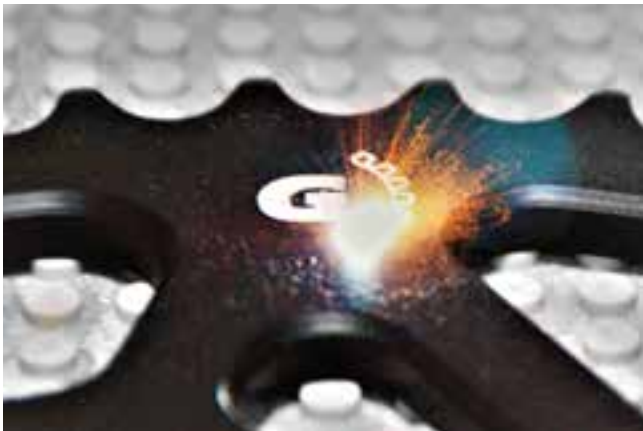

# WHAT KIND OF PRODUCTS DO WE MAKE?

We are specialized in the production of bespoke gears in small to a large quantities such as:

- Spur and helical gears
- Internal spur gears

# QUALITY AND CERTIFICATIONS

“Making quality” means satisfying the whole of properties and/or features of a product and/or a service that confer the capacity to meet the explicit requirements over time, through a continuous research aimed at improving processes business and product/service development.

Gandini Ingranaggi’s management aims to finalize the efforts of all staff to careful management of problems related to quality.

WE ARE

WE ARE

Gandini Race is the brainchild of Gandini ingranaggi specialized in mechanical components for racing motorcycles: Sprockets and Gear Boxes. Gandini Race was born from Gandini brother's passion who decided to register the brand starting a new global commercial adventure. In July 2019 we developed and patented a new technical design for the sprocket's production thanks also to the Leopard Team that competes for the #MOTO3 world title with the Gandini's sprockets. The continuous research and development of ever more advanced technologies to improve product quality and to meet the complex needs of the market has made the company more and more dynamic and powerful.

Gandini Race è partner tecnico nei campionati Mondiali e nazionali, tra i più famosi:  
Wsbk, MotoGP, Civ, TT, EWC, ETC., Motoamerica...
